

Developmental Milestones Reference Table- Males

According to guidelines for developmental assessments of babies and toddlers up to the age of six years

6 weeks to 3 months

#	↓ Milestone Age (months) →	0	1	. 2	2 3	4		
1.1	Visually follows a moving object horizontally	,	lm	nme	ediat	e ref	erral to MCHC doctor/ primary physician	
1.2	Vocalizes in response to human voice				At	age	2 months refer to MCHC doctor/ primary physician	
1.3	Smiles responsively)		At age 2 months refer to MCHC doctor/ primary physician				
1.4	Raises head		Т	Т			At age 4 months refer to MCHC doctor/ primary physician	

3 to 6 months

#	↓ Milestone Age (months) →	3	4	5
2.1	Visually follows a moving object vertically		lmm	ediate referral to MCHC doctor/ primary physician
2.2	Responds to rattling sound		lmm	ediate referral to MCHC doctor/ primary physician
2.3	Respods with joy to human voice*		lmm	ediate referral to MCHC doctor/ primary physician
2.4	Makes various sounds including constants (I.e. Mm rr gg)		A	At age 4 months refer to the primary physician and hearing test
2.5	Hands together, manipulates fingers		Α	At age 4 months refer to the primary physician
2.6	Grasps an object			At age 5 months refer to the primary physician
2.7	Head and chest up in prone position			At age 5 months refer to the primary physician

6 to 9 months

#	↓ Milestone Age (months) →		6	7	8	9	
3.1	Transfers an object from one hand to the other			At a	ige (6 m	nonths refer to the primary physician
3.2	Makes repetitive syllables-constant or vowels	9				Αt	age 8 months refer to the primary physician and hearing test
3.3	Rolls over from abdomen to back and back to abdomen						At age 9 months refer to the primary physician
3.4	Responds differently to familiar and stranger						At age 9 months refer to the primary physician

9 to 12 months

#	↓ Milestone Age (months) →	9	10	0 11	12	13
4.1	Taps two objects playfully		At	t age	9 m	onths refer to the primary physician
4.2	Crawls		At	t age	9 m	onths refer to the primary physician
4.3	Vocalizes in a dialogue		At	t age	9 m	onths refer to the primary physician and hearing test
4.4	Responds when addressed by name		At	t age	9 m	onths refer to the primary physician and hearing test
4.5	Feeds self		Pr	rovide	e gu	idance
4.6	Uses thumb- fingers grasp				At	age 11 months refer to the primary physician
4.7	Understands simple instructions					At age 12 months refer to the primary physician and hearing test
4.8	Imitating gestures and movements*					At age 12 months refer to the primary physician
4.9	Gets to sit without support					At age 13 months refer to the primary physician
4.10	Says one word or pronounces meaningful sounds					At age 13 months refer to the primary physician

12 to 18 months

#	↓ Milestone	12	13	14	15 1	6 1	7 18	В
5.1	Expresses will vocally or with gestures		At a	ige 1	2 mo	nth	s ref	er to the primary physician and hearing test
5.2	Makes eye contact and expresses reciprocity during joint game		At a	ige 1	2 mo	nth	s ref	er to the primary physician and hearing test
5.3	Walks with assistance			At ag	ge 13	mo	onths	s refer to the primary physician
5.4	Pulls to stand			At ag	ge 13	mo	onths	s refer to the primary physician
5.5	Points at familiar objects to request				Α	t ag	e 15	months refer to the primary physician and hearing test
5.6	Says 2-3 words							At age 18 months refer to the primary physician and hearing test
5.7	Places a cube inside a cup*							At age 18 months refer to the primary physician

18 to 24 months

	Age (years) →			1.5			2	
#					00 0	٠,		
	↓ Milestone Age (months) →	18	19 2	0 21	22 2	3 2	4 25 26 27	
6.1	Climbs upstairs with assistance		At age	e 18 m	nonth	s re	fer to the pri	mary physician
6.2	Walks without assistance		At age	e 18 m	nonth	s re	fer to the pri	mary physician
6.3	Eats independently with a spoon		Provid	de gui	idance	е		
6.4	Functional play*		At age	e 18 m	nonth	s re	fer to the pri	mary physician
6.5	Initiating interactions or mutual play*		At age	e 18 m	nonth	s re	fer to the pri	mary physician
6.6	Familiar with at least one body part			At a	age 20) mc	onths refer to	the primary physician
6.7	Builds a tower of cubes				At ag	e 21	l months refe	er to the primary physician
6.8	Squeezes and sticks out lips to give a kiss						Provid	de guidance
6.9	Has a vocabulary of over ten words							At age 27 months refer to the primary physician and hearing test

At each visit: it is important to provide advancing guidance compatible with age and an explanation about the milestones that will be checked at the next visit

* This milestone has come into use and is in the process of validating performance norms for expanding the scale. Not previously validated on the THIS developmental scale
